

THE PROJECT

ZAG concept
The practitioner's digital assistant

provide qualified scientific data for helping vet practitioners to improve management of their clinical cases

Project core team: Datascientists, Veterinarians, Statisticians, Scientific referent, IT developers, Mathematicians

OBSERVATION

Obvious **complexification** of clinical case management

huge amount of medical data
 multi species
 busy schedule

MARKET

veterinary

nutrition
 pharmacy
 biochemical analysis
 university

HOW IT WORKS?

Synergistic Association

Smart data

+

Datascience Algorithms

Data Management Machine Learning

ZAG FEATURES

target species (at this time)

ZAG takes into account the **context** of every clinical case

BENEFITS

Better efficiency

Gain in relevance, accuracy and speed

from **diagnosis** to **prognosis** and include **treatment**

More vet satisfaction

Increase success rate

More owner satisfaction

Enhance pet owner satisfaction

NEXT STEP

► **Financial support**
In order to launch ZAG concept in France and abroad <800 000€

► Partnership (possible licence agreement)
