

SIMV organizes since 2014

R&D dating for animal health and innovation

This year, the theme of the animal conference will be

Sourcing innovations from a more mature human health market to build assets and start-ups in animal health: How is this happening?

Tuesday 29th Nov. 2:00 – 3:00 pm

Animal Health Presentation

-1 projects selected this year

UMP IHAP ENVT INRAE

Roles and functions of sphingolipids and oxylipins in inflammatory and immune processes

NeoVoice

NeoVoice

Ouest Valorisation

5-LOXIB Tocotrienol Derivatives, new hemisynthetic inhibitors of 5-lipoxygenase

BYORNA

Bioproduction of mRNA in eucaryotic cells

JOLY

Thérapie du terrain

VETBIOLIX

Clinical stage First-in-class small molecules for treatment of Periodontal diseases, Gut Motility Disorders, Osteoarthritis affecting Pets

Nagi Bioscience SA

SydLab One - the first Organism-on-Chip high-content screening platform for anthelmintic drug discovery

MI:RNA Ltd

SATT LUTECH - SKINNYPEP

Optimization of Small Temporin-SHf Analogs with Antibacterial Activity

SATT SAYENS - VIRCO

Broad spectrum antivirals against doublestranded dna viruses

SATT AXLR - VARROAS MITES PROJECT

An innovative program based on AI enabling to count varroa mites of honey bees and facilitate beehives monitoring

SATT OUEST VALORISATION - PEPINHO

Powerful antibiofilm peptide extracted from brasilian pepper

SATT SAYENS - PROBIO+CELL

The first probiotic with direct fibrolytic activity to optimize digestion and health

SATT AXLR - MYOMU

A natural compound able to fight against muscle atrophy
